MBBS Year 2 Enrolment Information

To help you enrol for 2010 please follow the steps below.

Step 1: Please check the website below to determine when enrolment opens for your program: http://www.adelaide.edu.au/enrol/opentimes/.

Step 2: Complete your online Enrolment Checklist on Access Adelaide.

Step 3: (Please Note: There are no electives in semester 1: you must enrol in the Medical Microbiology and Immunology II course as indicated in Step 8.) Enrol in an approved semester 2 elective first (as per the list below). By enrolling in your semester 2 elective first, this should assist you to avoid clashes in your timetable for both semester 1 and semester 2.

Please note that Year 2 students MUST choose from the prescribed list of Health Sciences electives. There are no exceptions to this rule, and there will be no exemptions for electives - all Year 2 students must take an elective from the list in Semester 2.

Because Year 2 students have priority over the prescribed list, if a Year 2 student cannot gain a place in an elective because that place has been taken by a Year 3 student, the Year 3 student may be directed to choose a different elective.

For questions about policy please contact Professor Anna Chur-Hansen - anna.churhansen@adelaide.edu.au or 8222 5785.

Approved Year 2 Electives:

- Psychiatry - Emotion, Culture and Medicine (25 places for MBBS Year 2 students, 25 places for Psychology students. Note: Year 3 MBBS students will be allowed to enrol if the course fits the timetable, but Year 2 students have priority.)
- Anatomical Sciences - Limb Dissection (40 MBBS places)
- Anatomical Sciences - Cranial Nerve Dissection (40 MBBS places)
- General Practice - Indigenous Health (25 MBBS places)
- Obstetrics and Gynaecology - Human Reproductive Health (40 places and they will accept Years 2 and 3)
- Public Health - International Health (50 places, with an additional 30 places reserved for non-MBBS students)

NOTE: In the event there are no available places in any of the above electives, please contact lisa.mutilow@adelaide.edu.au on 8303 6219.

Step 4: Enrol in your Clinical Skills class for semester 2. Please select a class that does not clash with your elective and make note of the ‘Section’. Make sure you enrol in the same Clinical Skills ‘Section’ for semester 1. The “Section” is a code, eg. CL01 and this code determines which class you are in. Here is the link to get the class number for your semester 1 Clinical Skills course.

Step 5: You can now complete your semester 1 enrolment. You will need to enrol in to Medical Professional & Personal Development II Pt1. Find the class number for the Lecture and then select a tutorial for your related class. Please note that the tutorial you select will determine what resource session you can select in the Scientific Basis of Medicine course. Please make sure that you take note of the section for the tutorial and enrol in the same section for semester 2.

Step 6: Next course to enrol in is, Scientific Basis of Medicine. Once again, find the class number for the lecture and then select a CBL and Resource Session as your related classes to enrol in to. Please make note of the section you have enrolled in as you will need to enrol in the same classes for your semester 2 enrolments.

Step 7: The last MEDIC ST course to enrol in to is the Exam.

Step 8: Semester 1 has a new compulsory course, Medical Microbiology and Immunology II. The enrolment component is the lecture and the related class is the tutorial. When selecting the tutorial please select a time that does not clash with your Clinical Skills class.
Step 9: Make sure that you have enrolled in all of the semester 2 MEDIC ST courses. Here are the links to the courses:

- Medical Professional & Personal Development
- Scientific Basis of Medicine
- Exam
- Clinical Skills – You should already be enrolled in this course.

If you have any troubles with your enrolment please check this website http://www.adelaide.edu.au/enrol/steps/ or contact the Student Centre on 8303 3833 or via email enrol.help@adelaide.edu.au

Regards
Medicine Learning and Teaching Unit
